CONTROLS ROACHES, DRAIN AND FRUIT FLIES, BEDBUGS, AND STORED PRODUCT PEST POPULATIONS
USE IN AREAS OF FOOD HANDLING ESTABLISHMENTS

SPECIMEN LABEL

ACTIVE INGREDIENT:
DI(Hydrosphenyl CAS #65733-18-8) 90%
OTHER INGREDIENTS*: 5%

TOTAL 100%

*Contains petroleum distillates

ERMA No. 2724–351

KEEP OUT OF REACH OF CHILDREN CAUTION
SEE ADDITIONAL PRECAUTIONARY STATEMENTS

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling.

DIRECTIONS FOR USE

Apply GENTROL as a fog or an ultra-low volume (ULV) foggling (space spray/mist) application for control of drain flies, fruit flies, roaches, drain and fruit flies, bedbugs, and stored product pests (examples of these pests include Indianmeal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain beetles, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetle). Flies and bedbugs exposed to the GENTROL IGR will become adults incapable of breeding. GENTROL also disrupts the normal life cycle of stored product pests, drain and fruit flies, and fleas, thus killing these insects during the pupal stage. In both cases, the cycle of an infestation ends. Use GENTROL IGR Concentrate (GENTROL) in apartment buildings, basement, bathroom facilities, breweries, boiler rooms, cafeterias, candy plants, grocery stores, day care centers, hospitals, residential homes, hotels/motels, office buildings, kitchens, laboratories, cereal processing facilities, manufacturing plants, massaulous, meat and produce canneries, nursing homes, restaurants, schools, locker rooms, stores, taverns, warehouses, as well as various modes of transportation such as aircraft, buses, trucks, trailers, rail cars, and marine vessels.

USE GENTROL as a general surface spray, fogging, spot, or crack and crevice application. Prior to using in commercial or (house)hold food areas, please refer to the Food Handling Establishment Application section of the label. The preparations prior to treatment and the clean up after application described therein are also to be followed for residential (house)hold food areas.

INSTRUCTIONS FOR USE

Mix GENTROL with water and apply with spray or hand application equipment, such as handpump or pressurized sprayers capable of delivering general surface fogging, (space spray/mist), spot, crack and crevice spray applications, or with a paint brush, roller, or similar device.

DILUTION PREPARATION

FOR SURFACE SPRAY/PAINT BRUSH, SPOT AND CRACK AND CREVICE PREPARATIONS

Use 1 ounce of GENTROL to 1 gallon of water. Partially fill the mixing container with water, add the GENTROL, shake or stir, and fill to final volume. Use diluted solution within 48 hours of mixing. Shake or stir before each use. For fogging preparation follow equipment manufacturer’s instructions.

TANK MIXING

GENTROL may be tank mixed with adulticides labeled for fogging. Follow the directions of the more restrictive label when tank mixing. Use water or oil as a diluent, depending on the type of equipment used. Fogging application equipment is best for larger facilities including warehouses (Refer to Warehouses section below). Close room or warehouse and shut off all ventilation systems. Apply the product in the air and direct mist toward all areas that may be targeted for coverage. After treatment, leave the room closed for 30 minutes or longer as recommended by the equipment manufacturer or the labels of other products applied in tank mixing. Do not remain in treated area, ventilate before reentry.

SPOT AND CRACK AND CREVICE APPLICATIONS

Apply GENTROL diluted spray solution using either a pressurized spray system capable of delivering a pinpoint or variable spray pattern or a device capable of coating evenly. Make crack and crevice applications directly to areas such as caves, basements, floors, ceilings, walls, or walls. Make spot treatments to areas such as storage areas, crevices around water pipes, doors, windows, and behind and under appliances/equipment, furniture and beds. To treat bed bugs, apply harborage points mentioned above, in addition, under beds, behind, side of box springs (do not treat linens and mattresses), under and behind night stands, to points where carpet and wall meet, cracks in baseboard molding, and other areas where bed bugs harborage.

WAREHOUSES (Non-Food)

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in nonfood storage warehouses. Apply to all areas that may harbor pests, including under and between pallets.

FOOD HANDLING ESTABLISHMENT APPLICATIONS

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in both food and non-food areas of Food Handling Establishments. These establishments are defined as places other than private residences where exposed food is held, prepared, processed, or served. It also includes areas where food items are received, prepared, packaged, and stored, as well as enclosed food processing systems (kitchens, dairies, etc.).

SPOT AND CRACK AND CREVICE APPLICATIONS

Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food handling surfaces.

FOR CONTROL OF DRAIN FLIES, FRUIT FLIES

Apply GENTROL to areas of flying. For drains, apply product into and around the downspout and catch basin area. Cost these areas thoroughly as flies larvae develop in the scum buildup on the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

ALTERNATE DIRECTIONS FOR FOAM APPLICATION

Refer to the Dilution Preparation section of this label for appropriate dilution rate for GENTROL. To convert GENTROL dilution to a foam, add foaming agent or manufacturer’s rate. For best results, use the higher amount of the foaming agent rate range. Follow the requirements of the foam equipment manufacturer.

SURFACE SPRAY APPLICATION

DO NOT APPLY GENTROL FOOD PRODUCTS

GENERAL AREA TREATMENTS

Refer to the Dilution Preparation section of this label for Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

WAREHOUSES (Food)

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuff is not anticipated.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE

Store in a cool area away from children.

PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL

Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash.

For information, call 1-800-248-7763 or visit our Web site: www.zoecon.com

FOGGING (SPACE SPRAY/MIST) APPLICATION

Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

WAREHOUSES (Food)

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in nonfood storage warehouses. Apply to all areas that may harbor pests, including under and between pallets.

GENERAL AREA TREATMENTS

Refer to the Dilution Preparation section of this label for Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

PARTIAL AREA TREATMENTS

GENTROL can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established (10 feet in all directions from the treated area), where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

PAINT/ CABINETS, SMALL FOOD STORAGE AREAS

Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Do not store food in open containers in treated pantries. Destroy any unused packaging materials to ensure proper control.

Fogging (Space Spray/Mist) Precautions

- Keep out of reach of children.
- Do not contaminate food, water, or feed by storage or disposal.
- Do not contaminate water, food, or feed by storage or disposal.

GENTROL has been determined to be compatible with a myriad of general surface treatments used in food handling establishments, including in the food contact area. See the label for additional compatibility data.
CONTROLS ROACHES, DRAIN AND FRUIT FLIES, BEDBUGS, AND STORED PRODUCT PEST POPULATIONS

KERST EN, Reg. No. 2724–351

KEEP OUT OF REACH OF CHILDREN CAUTION

SEE ADDITIONAL PRECAUTIONARY STATEMENTS

PRECAUTIONARY STATEMENTS

Hazardous to humans and animals – CAUTION

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling.

FIRST AID:

If swallowed: immediately call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses. If persistent, after the initial 5 minutes. Then continue rinsing eye.

If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of water for 15-20 minutes.

INSTRUCTIONS FOR USE

Mix GENTROL with water and apply with spray or hand application equipment, such as handpressurized or pressurized sprayers capable of delivering general surface fogging, spot applications, or prepped, packaged, and stored, as well as carpet, airline, tractor, rail cars, and marine vessels.

Use GENTROL as a general surface spray, fogging, spot, or crack and crevice application. For information, call 1-800-248-7763 or visit our Web site: www.zoecon.com.

DILUTION PREPARATION

FOR SURFACE SPRAY/PARTICLE SPOT, SPOT AND CRACK AND CREVICE PREPARATIONS

Use 1 ounce of GENTROL to 1 gallon of water. Partially fill the mixing container with water, add the GENTROL and mix. Shake or stir and fill to final volume. Use diluted solution within 48 hours of mixing. Shake or stir before each use. For fogging preparation follow equipment manufacturer’s instructions.

TAKE MIXING

GENTROL may be tank mixed with an adulticide currently registered for use, unless the product label prohibits such use. Use the maximum allowed adulticide rate in accordance with the more restrictive label limitations and precautions.

GENERAL SURFACE APPLICATION

Apply the GENTROL dilution at a rate of 1 gallon per 1,500 sq ft of surface area. Use spray/application equipment capable of delivering a variable spray or coating to uniformly apply the solution. Apply to areas such as walls, floors, ceilings, attics, basements, or crawlspaces. NOTE: Prior to treatment around air ducts, make crack and crevice treatments in warehouses where exposed food may have been handled, held, prepared, processed, or served. If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

WAREHOUSES (Food)

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in warehouses where exposed food may have been handled, held, prepared, processed, or served. If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

PARITAL AREA TREATMENTS

GENTROL can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established 6 feet in all directions from the treated area, where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

PANTRY/CABINETS, SMALL FOOD STORAGE AREAS

Apply as a surface spray, crack and crevice spray, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Do not store food in open containers in treated pantries. Destroy any infested food packages to ensure proper control.

FOGging (SPACE SPRAY/INSET) APPLICATION

Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

FOOD STORAGE ESTABLISHMENTS

Apply GENTROL to areas of fly breeding. For drains, apply product into and around the downslope and catch basin areas. Coat these areas thoroughly as flies larvae develop in the scum buildup on the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

ALTERNATIVE DIRECTIONS FOR FOAM APPLICATION

Refer to the Dilution Preparation section of this label for appropriate dilution rate for GENTROL to convert GENTROL dilution to a foam, adding foam equipment manufacturer’s dilution pump. For best results, use the higher amount of the foaming agent rate. Follow the requirements of the foam equipment manufacturer.

SURFACE SPRAY APPLICATION

DO NOT APPLY FOOD PRODUCTS

GENERAL AREA TREATMENTS

Refer to the Dilution Preparation section of this label for appropriate dilution rate for GENTROL. To convert GENTROL dilution to a foam, add foam equipment manufacturer’s dilution pump. For best results, use the higher amount of the foaming agent rate. Follow the requirements of the foam equipment manufacturer.

STORAGE

Store in a cool area away from children.

Pesticide Disposal

Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL

Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash.

FOR CONTROL OF DRAIN FUES, FRUIT FLIES

Apply GENTROL to areas of fly breeding. For drains, apply product into and around the downslope and catch basin areas. Coat these areas thoroughly as flies larvae develop in the scum buildup on the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

PHYSICAL OR CHEMICAL HAZARDS

Do not use this product in or on electrical equipment, the possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

GENTROL® (Insect Growth Regulator; IGR) is a synthetic, juvenile hormone “look-alike” which disrupts the normal growth development of cockroaches, drain flies, fruit flies, bedbugs, and stored product pests (examples of these pests include Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain beetles, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetles). Bait rhinos and bedbugs exposed to the GENTROL® IGR will become adults incapable of reproducing. GENTROL® also disrupts the normal life cycle of stored product pests, drain and fruit flies, and thus kills these insects during the pupal stage. In both cases, the cycle of an infestation ends. Use GENTROL® Insect Growth Regulator (IGR) in apartment buildings, Locker rooms, stores, taverns, warehouses, as well as carpet, airline, tractor, rail cars, and marine vessels.

FOOD HANDLING ESTABLISHMENTS

Apply GENTROL as a general surface, fogging, spot, or crack and crevice treatment in food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established 6 feet in all directions from the treated area, where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

Vomiting may cause aspiration pneumonia.

Use GENTROL® as a general surface spray, fogging, spot, or crack and crevice application. Prior to using in commercial or residential (household) food areas, please refer to the Food Handling Establishment Applications section of the label. The preparations prior to treatment and the clean up after application described therein are also to be followed for residential (household) use.

INSTRUCTIONS FOR USE

Mix GENTROL® with water and apply with spray or hand application equipment, such as hand-pumped or power-operated sprayers capable of delivering general surface fogging, spotting (spray/spot/mist), spot, crack and crevice spraying applications, or with a paint brush, roller, or cloth. Use GENTROL® as a general surface spray, fogging, spotting, or crack and crevice application.

DILUTION PREPARATION

Use 1 ounce of GENTROL® to 1 gallon of water. Partially fill the mixing container with water, add the GENTROL®, shake or stir, and fill to final volume. Use diluted solution within 48 hours of mixing. Shake or stir before each use. For fogging preparation follow equipment manufacturer’s instructions.

TANK MIXING

GENTROL® may be tank mixed with an adjuvants currently registered for use, unless the product label prohibits such use. Use five resulting tank mixtures in accordance with the more restrictive label limitations and precautions.

GENERAL SURFACE APPLICATION

Apply the GENTROL® dilution at a rate of 1 gallon per 1,500 sq ft of surface area. Use spray/application equipment capable of delivering a variable spray or coating to uniform coverage of the surface. Apply the solution. Apply to areas such as walls, floors, ceilings, attics, basements, or crawlspaces. NOTE: Prior to turning around or ducts, shut off ventilation system. Allow treatment to dry prior to turning on ventilation system.

FOGGING (SPACE SPRAY/MAST) APPLICATION

Apply GENTROL® as a fog or an aerosol with liquid (ULV) mist with equipment such as ULV, mechanical mixing sprayers, aerosol generators, or thermal foggers to achieve uniform coverage. Follow equipment manufacturer’s instructions. Apply at a rate of 1 ounce GENTROL® per 12,000 cu ft. GENTROL® may be tank mixed with adjuvants labeled for fogging. Follow the directions of the more restrictive label when tank mixing. Water or oil as a diluent, depending on the type of equipment used. Fogging applications are best for larger facilities such as warehouses (Refer to Warehouses section below). Close room or warehouse and shut off all ventilation systems. Apply the product in the air and close doors and windows to direct the spray to target areas. After treatment, leave the room closed for 30 minutes or longer as recommended by the equipment manufacturer or the labels of other products applied in tank mixing. Do not remain in treated area, ventilate before reentry.

SPOT AND CRACK AND CREVICE APPLICATIONS

Apply GENTROL® diluted spray solution using either a pressurized spray system capable of delivering a pinpoint or variable spray pattern or a device capable of coating evenly. Make crack and crevice applications directly to areas such as crevices, basements, foundations, walls, ceilings, or walls. Make spot treatments to areas such as storage areas, cracks around water pipes, doors, windows, and behind and under appliances/equipment, furniture, and beds. To treat harborage, apply to harborage points mentioned above, in addition, under beds, below side of base of bay windows (do not treat window and matress), under and behind night stands, to points where carpet and wall meet, cracks in crown base, molding, and other areas where bedbugs harborage.

WAREHOUSES (Non-Food)

Apply GENTROL® as a general surface, fogging, spotting, or crack and crevice treatment in non-food storage warehouses. Apply to areas that may harbor pests, including under and between pallets.

FOOD HANDLING ESTABLISHMENT APPLICATIONS

Apply GENTROL® as a general surface, fogging, spotting, or crack and crevice treatment in both food and non-food areas of Food Handling Establishments. These establishments are defined as places other than private residences where exposed food is held, prepared, processed, or served. It also includes areas where food items are received, prepared, packaged, and stored, as well as enclosed food processing systems (e.g., canning, drying, etc.).

SPOT AND CRACK AND CREVICE APPLICATIONS

Prior to application, remove or cover all food items in area to be treated. Do not apply directly to food or food handling surfaces.

FOGGING (SPACE SPRAY/MAST) APPLICATION

Prior to application, remove or cover all food items. Also, cover all food contact surfaces (e.g., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment.

WAREHOUSES (Food)

Apply GENTROL® as a general surface, fogging, spotting, or crack and crevice treatment in warehouses where packaged food items are stored in such a way that direct contact with the foodstuff is not anticipated. GENTROL® may be tank mixed with adjuvants labeled for fogging. Follow the directions of the more restrictive label when tank mixing. Partial area treatments, a perimeter of at least 6 feet must be established (5 feet in all directions from the treated area) where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

PARTIAL AREA TREATMENTS

GENTROL® can be applied to partial areas of food handling establishments in cases of small or localized infestations. For partial area treatments, a perimeter of at least 6 feet must be established (5 feet in all directions from the treated area), where all food handling surfaces are either covered at the time of treatment, or thoroughly cleaned by a method effective in removing chemical residues after treatment.

PANTRY/CABINETS, SMALL FOOD STORAGE AREAS

Apply as a spray, crack and crevice treatment, or spot treatment to pantry and cupboard shelves or other areas where food is stored. Prior to spraying, remove all food containers and foodstuffs. Do not replace food containers or foodstuffs until spray has dried. Do not store food in open containers in treated pantries. Destroy any infested food packaging to ensure proper control.
GENERAL INFORMATION
GENTROL® is an Insect Growth Regulator (IGR), is a synthetic, juvenile hormone “look-alike” which disrupts the normal growth development of cockroaches, drain flies, fruit flies, bedbugs, and stored product pests (examples of these pests include Indian meal moths, rice moths, tobacco moths, red flour beetles, confused flour beetles, lesser grain beetles, merchant grain beetles, sawtooth grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetle larvae). GENTROL also disrupts the normal life cycle of stored product pests, grain beetles, warehouse beetles, cigarette beetles, and Dermestid beetle larvae. GENTROL may be tank mixed with other products labeled for tank mixing. Do not apply GENTROL directly to food products. For information, call 1-800-248-7763 or visit our Web site: www.zoecon.com

FOGGING (SPACE SPRAY/INST.) APPLICATION
Prior to application, remove or cover all food items. Also, cover all food contact surfaces (i.e., equipment, benches, shelves - areas where exposed food may be handled, held, prepared, processed, or served). If left uncovered, these areas must be thoroughly cleaned by a method capable of removing chemical residues after treatment. Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL
Do not dispose of empty containers. Securely wrap original container in several layers of newspaper and discard in trash.

STORAGE
Store in a cool area away from children.

PESTICIDE DISPOSAL
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

FOR CONTROL OF DEAN FUELS, FRUIT FUELS
Apply GENTROL to areas of fly breeding. For drains, apply product into and around the drainspout and catch basin areas. Clean these areas thoroughly as fly larvae develop in the scum buildup on the sides of drain pipes. Repeat applications at 2 to 4 week intervals depending upon the severity of infestation.

ALTERNATE DIRECTIONS FOR FOAM APPLICATION
Refer to the Dilution Preparation section of this label for appropriate dilution rate for GENTROL. To convert GENTROL dilution to a foam, add foaming agent or manufacturer’s rate. For best results, use the higher amount of the foaming agent rate. Follow the requirements of the foam equipment manufacturer.

PANTRY/CABINETS, SMALL FOOD STORAGE AREAS
Apply GENTROL to any areas that may harbor pests, including under and between pantries.

GENERAL AREA TREATMENTS
Refer to the Dilution Preparation section of this label for appropriate dilution rate for GENTROL. To convert GENTROL dilution to a foam, add foaming agent or manufacturer’s rate. For best results, use the higher amount of the foaming agent rate. Follow the requirements of the foam equipment manufacturer.
